SKILLS

React

TypeScript

JavaScript

Semantic HTML

CSS

SASS

Git

Agile Methodologies

BEM

Linux

Webpack

PROFILE

I am a junior front-end web developer with a solid foundation in React.js, JavaScript, Git, and SASS, among other skills. Currently, I am expanding my skill set by learning TypeScript (just finished a couple of courses). I strive to create high-quality, accessible and performant web applications that deliver value to end-users.

EMPLOYMENT HISTORY

Customer Success Manager, CyberCare, UAB

Vilnius

Nov 2021 — Oct 2022

- Provided solutions to Surfshark VPN clients from around the world.
- Gained extensive knowledge in VPN technology, router basics and network configurations.
- Conducted a workshop with a colleague to teach co-workers about the basics of Bash, the philosophy surrounding Linux and how to apply the knowledge every day at work.

Customer Success Manager, Planas Chuliganas, UAB

Vilnius

Mar 2020 — Mar 2021

I used to work on a well known international project based in Vilnius as a customer success manager in written English.

Gained:

- Important lessons on customer communication.
- Improvements of written English skills.

EDUCATION

Bachelor's, Vilnius University

Vilnius

Sep 2016 — Feb 2019

I went on a pause in the middle of the third year of my studies and later started coding on my own. No longer a student since February, 2023.

HOBBIES

I have a diverse range of interests and hobbies that keep me busy. Most importantly, I love playing musical instruments, such as drums and guitar, creating music using modular synthesis, and occasionally DJing. In my free time, I also experiment with ceramics and have recently taken an interest in playing chess. Additionally, I find pleasure in enhancing and customizing my Arch Linux system.

INTERNSHIPS

Sourcery Academy for Front-End , DevBridge, Cognizant Softvision

Vilnius

Oct 2022 — Jan 2023

It's a 3-month high intensity program. Here are the lecture topics: Agile methodology, semantic HTML, web accessibility standards, JavaScript and React fundamentals, advanced features of React, dynamic components, advanced CSS/SCSS, Git, project structure, BEM methodology, Agile, Git, build tools (WebPack at the center).

Our team of 4 students worked on an assigned project for 3 months. We were given a custom design which was a ton of fun to implement (there also was no mobile design given, so it was a perfect chance to get creative for us). Although we were 2 people short, the project won the final demo competition, where all teams presented their work.

COURSES

Understanding Typescript, Academind GmbH

Feb 2023 — Mar 2023

React and TypeScript, v2, Frontend Masters

Mar 2023 — Mar 2023
