EXPERIENCE

Full-Stack Web Developer
Enable.
Jan 2024 - Present

The company focuses on developing digital products for foreign markets, and as the first external developer to join, I played a key role in building and maintaining its products. Working in a fast-paced environment, I quickly adapted to complex challenges and took ownership of critical tasks, establishing myself as a core member of the company.

My primary responsibilities include working on front-end and back-end development tasks, reviewing code, responding to incidents, providing technical support and communicating with other teams (design, CRO, marketing, product) to accomplish the company's goals. On a daily basis, I work with technologies such as Next.js, TypeScript, PostgreSQL (Supabase), Prisma and NestJS. Beyond my main web development tasks, I have also set up a company VPN, and implemented QA guidelines for our testers to follow, and wrote scripts to help other team members solve challenges.

Front-End Internship at Sourcery Academy
Devbridge, Cognizant Softvision
Oct 2022 – Jan 2023

The program was a 3-month, high-intensity experience that combined theory and practical application. Key lecture topics included Agile methodology, semantic HTML, web accessibility standards, JavaScript and React fundamentals, advanced React features, dynamic components, advanced CSS/SCSS, Version Control - Git, project structure, BEM methodology, build tools (with WebPack at the center), and more.

As part of a team of four students, we worked on an assigned project throughout the program. We were tasked with implementing a custom design, which was both engaging and challenging—especially as no mobile design was provided, giving us the opportunity to exercise our creativity. Our hard work paid off as our project won the final demo competition, where all teams showcased their efforts.

Full-Stack Web Developer

Nobigscience

Jul 2023 - Present

In my free time, I'm working on the front-end and back-end of an MVP project using React.js, Express.js TypeScript, Tailwind CSS, Passport.js, Contentful CMS and other technologies. We took the challenge of setting up everything ourselves, including all the project structure and custom code deployment (CI/CD with Docker, GitHub Actions) on our own servers. I have also set up a private company-wide documentation tool and Jira for task management.

EDUCATION

Bachelor's Degree, Biology

Vilnius University

2016 - 2023

Activities and societies: FIDI (Physicist's Day) activities.

I paused my studies in the third year to focus on coding and later terminated my enrollment to fully immerse myself in programming.

Courses:
- Java Programming I (MOOC), University of Helsinki (In Progress)
- Understanding Typescript, Academind GmbH
- React and TypeScript (v2), Frontend Masters
- React - The Complete Guide, Academind GmbH
- JavaScript - The Complete Guide, Academind GmbH
- CSS - The Complete Guide, Academind GmbH

SKILLS

- Next.js
- React.js
- TypeScript
- JavaScript
- Prisma
- Node.js
- NestJS
- Express.js
- Tailwind CSS
- PostgreSQL

- Docker
- Semantic HTML
- CSS
- SASS
- Git
- BEM
- Arch Linux
- Debian Linux
- WebPack
- Vite

- Figma
- Jira
- REST APIs
- CRUD
- Docker
- Github Actions
- Agile
- Scrum
